

Setting up Application Environment

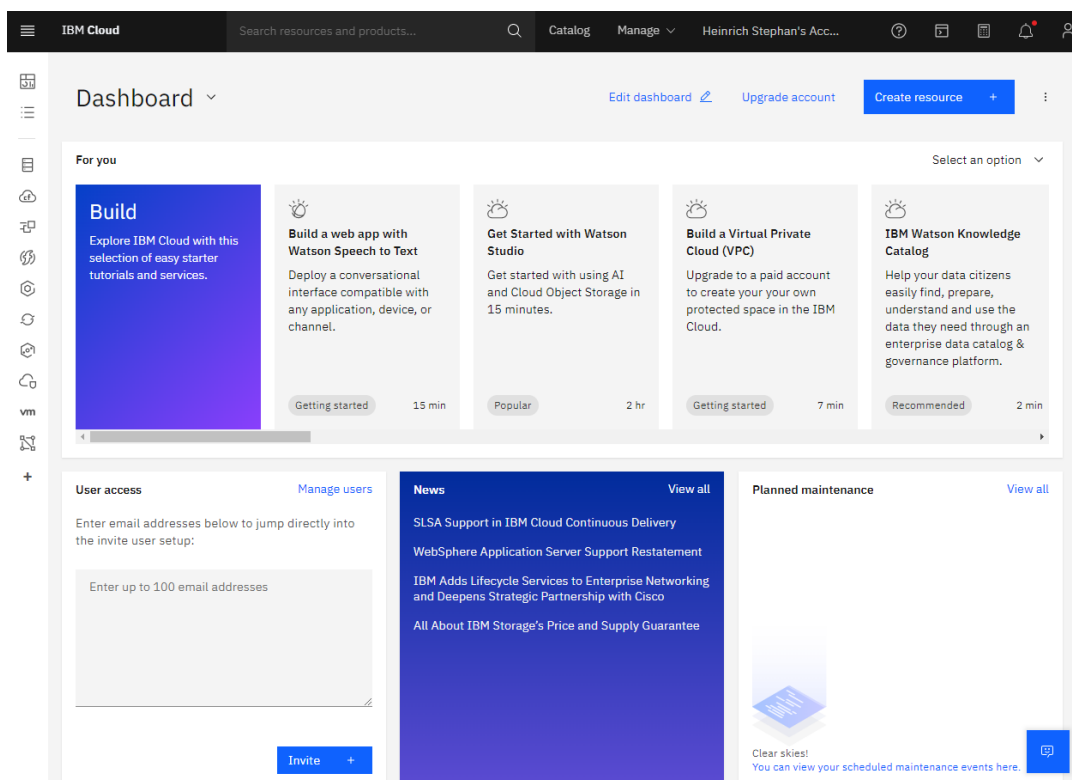

Install IBM Cloud CLI

Step 1. Navigate to cloud.ibm.com

The screenshot shows the IBM Cloud Container Registry interface. On the left is a sidebar with navigation links: Container Registry, Quick start, Namespaces, Repositories, Images, Trash, and Settings. The main content area is titled 'Quick start' and includes a 'Location' dropdown set to 'Global'. A 'Welcome!' message follows, stating: 'Let's get started by installing the needed CLIs, setting up your first private registry namespace, and pushing your first image.' Below this, a section 'Install, Set Up, and Log In' lists five steps: 1. Install the IBM Cloud CLI (with a link), 2. Install the Docker CLI, 3. Install the Container Registry plug-in (with a terminal command: `ibmcloud plugin install container-registry -x 'IBM Cloud'`), 4. Log in to your IBM Cloud account (with a terminal command: `ibmcloud login -a https://cloud.ibm.com`), and 5. Ensure that you're targeting the correct IBM Cloud Container Registry region (with a terminal command: `ibmcloud cr region-set global`). Step 6 is partially visible: 'Choose a name for your first namespace, and create that namespace. Use this namespace for the rest of the Quick Start.' A URL at the bottom left reads: https://cloud.ibm.com/docs/containers?topic=containers-cs_cli_install.

Step 2. Search on Container Registry and give get started and follow the steps to install IBM Cloud CLI

The screenshot shows the IBM Cloud Dashboard. At the top is a navigation bar with 'IBM Cloud', a search bar, and links for 'Catalog', 'Manage', and the user's account. The main content area is titled 'Dashboard' and includes links for 'Edit dashboard', 'Upgrade account', and 'Create resource'. Below this is a 'For you' section with five cards: 'Build' (Explore IBM Cloud with this selection of easy starter tutorials and services.), 'Build a web app with Watson Speech to Text' (Deploy a conversational interface compatible with any application, device, or channel.), 'Get Started with Watson Studio' (Get started with using AI and Cloud Object Storage in 15 minutes.), 'Build a Virtual Private Cloud (VPC)' (Upgrade to a paid account to create your own protected space in the IBM Cloud.), and 'IBM Watson Knowledge Catalog' (Help your data citizens easily find, prepare, understand and use the data they need through an enterprise data catalog & governance platform.). Each card has a 'Getting started' button and a duration. Below the 'For you' section are three more sections: 'User access' (Manage users, Enter email addresses below to jump directly into the invite user setup: Enter up to 100 email addresses, Invite), 'News' (View all, SLSA Support in IBM Cloud Continuous Delivery, WebSphere Application Server Support Restatement, IBM Adds Lifecycle Services to Enterprise Networking and Deepens Strategic Partnership with Cisco, All About IBM Storage's Price and Supply Guarantee), and 'Planned maintenance' (View all, Clear skies! You can view your scheduled maintenance events here.).

Summary

Manage Docker container images in a fully managed private registry. Push private images into this registry to run them in IBM Cloud Kubernetes Service and other runtime environments. Images are checked for security issues, so that you can make informed decisions about your deployments.

Features

Highly available and scalable private registry
Set up your own image namespace in a multi-tenant, highly available, scalable private registry that is hosted and managed by IBM. Securely store your private Docker images and share them with users in your IBM Cloud account.

Image security compliance with Vulnerability Advisor
Benefit from the automatic scanning of images in your namespaces. Review suggestions, which are specific to your operating system, to fix potential vulnerabilities and protect your containers from being compromised.

Quota limits for storage and pull traffic
Benefit from free storage and pull traffic to your private images until you reach the limit for your free quota. Set custom quota limits for the amount of storage and pull traffic per month so that you avoid exceeding your preferred payment level.

Pricing plans

| Plan | Features | Pricing |
|------|---------------------------------------------------------------------------------------|---------|
| Lite | Free Plan with limited resources Storage (Gigabyte-Months) - 0.5 GB free per month | Free |
